EXPERIENCE

Flipkart, Bengaluru, India

Jan 2026 – Present

Software Development Engineer - 1

Jul 2026 – Present

SDE Intern

Jan 2026 – Jun 2026

- Build cross-platform mobile features in React Native and TypeScript for Flipkart Minutes, a new standalone quick-commerce app currently in internal pre-launch testing, spanning Homepage, Product, Account, and Cart.
- Built reusable Atlas design system widgets and integrated backend APIs to create scalable, server-driven UI components across multiple application modules.
- Optimize interactive components and animations (bottom sheets, modals, custom tab headers) using React Native's animation and gesture APIs, improving perceived load and interaction latency.

Salesforce, Hyderabad, India

May 2025 – Jul 2025

AMTS Intern

- Developed an enterprise-grade Retrieval-Augmented Generation (RAG) system using Salesforce Einstein AI as the LLM with PostgreSQL vector embeddings for scalable storage, processing 10,000+ knowledge base entries from GUS, Confluence, GitHub repositories, and public documentation.
- Designed and implemented automated data pipelines with document processing, chunking, and embedding capabilities, improving knowledge retrieval accuracy by 40%.
- Developed the Ensure Refunds workflow and functional test suites, securing DRB and CX approval for production deployment.

LEADERSHIP & CAMPUS INVOLVEMENT

AlgoZenith, NITC, Kerala, India

2023 – 2025

Contest Editoralist & Mentor

- Published weekly contest editorials for competitive programming platforms (LeetCode, CodeChef, Codeforces), explaining algorithmic approaches and optimization techniques to 1000+ students.
- Contributed daily problem solutions for LeetCode and GeeksforGeeks, focusing on data structures, algorithms, and system design concepts.
- Mentored junior students in technical interview preparation, improving problem-solving skills and coding proficiency.

EDUCATION

National Institute of Technology, Calicut, Kerala, India

Nov 2022 – Jun 2026

Bachelor of Technology in Computer Science and Engineering

CGPA: **9.62/10.0**

TECHNICAL SKILLS

Languages: C, C++, Python, SQL, JavaScript, TypeScript

Frontend & Mobile: React.js, React Native, HTML, CSS, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, Spring Boot, RESTful APIs

Databases & Cloud: MongoDB, PostgreSQL, MySQL

Machine Learning: scikit-learn, Pandas, NumPy, Regression, Classification, Clustering

Core CS: Data Structures & Algorithms, System Design, OOP

ACHIEVEMENTS & CERTIFICATIONS

- Solved 900+ LeetCode problems, with strong command of data structures, algorithms, and complexity analysis.
- The Complete Web Development Bootcamp – Udemy
- Machine Learning A-Z – Udemy

PROJECTS

Alumni Network Platform (Full-Stack Web Application) | Spring Boot, React.js, Tailwind CSS

- Developed a responsive full-stack alumni networking platform serving 500+ users, with features for professional connections, job opportunity sharing, and collaborative engagement.
- Implemented secure user authentication, comprehensive profile management, real-time private messaging, group chat functionality, and automated email invitations.
- Built a job opportunity sharing module, dynamic gallery management system, and event posting features, increasing platform engagement by 40% and improving user retention.

MERN Stack Blog Application (Personal Blog Platform) | MongoDB, Express.js, React.js, Node.js

- Developed a full-featured responsive blog application using the MERN stack, with modern UI/UX design principles and Tailwind CSS for styling.
- Implemented secure authentication and authorization using JSON Web Tokens (JWT) and Google OAuth integration.
- Built an interactive comment system and post engagement features (likes, shares) with real-time updates, supporting multi-user interactions and content management.
